1.0 EVALUATION SCOPE

1.1 Compliance with the following codes:
   - 2021, 2018, 2015 and 2012 International Residential Code (IRC)

Properties evaluated:
   - Structural
   - Air infiltration
   - Water penetration resistance
   - Durability

1.2 Evaluation to the following green standard:

Attributes verified:
See Section 2.0.

2.0 USES

The VELUX Dynamic Dome Skylights are non-operable plastic-glazed unit skylights complying with IBC Sections 2405 and 2610 and IRC Section R308.6.

The attributes of the skylights have been verified as conforming to the requirements of (i) ICC 700-2015 Section 701.4.3.3 and 11.701.4.3.4 and ICC 700-2012 Section 701.4.3.3 and 11.701.4.3.3 for fenestration air leakage. Note that decisions on compliance for those areas rest with the user of this report. The user is advised of the project-specific provisions that may be contingent upon meeting specific conditions, and the verification of those conditions is outside the scope of this report. These codes or standards often provide supplemental information as guidance.

3.0 DESCRIPTION

3.1 Single Dynamic Domes:

The VELUX CDS Single Dynamic Domes consist of a single geometric-shaped plastic dome factory-attached to an aluminum extruded frame with an aluminum extruded retainer cap.

The frame and retainer cap is manufactured from 0.06-inch-thick (1.52 mm) 6063-T5 or 6063-T6 aluminum. See Figure 1.

The plastic dome is manufactured from a translucent-white polycarbonate panel with a uniform thickness of 0.118 inch (3.00 mm). The panel is recognized as Plaskolite, LLC’s Tuffak® SK1 under ESR-2728.

3.2 Double Dynamic Domes:

The VELUX CD2 and CE2 Double Dynamic Domes consist of double geometric-shaped plastic domes factory-attached to an aluminum extruded frame with an aluminum dome clamp, spring clips, hold downs, and cap cover spacers.

The frame and dome clamp is manufactured from 0.06-inch-thick (1.52 mm) 6063-T6 aluminum. See Figure 2.

The spring clip is manufactured from 301 stainless steel.

The hold down and cap cover spacer is manufactured from rigid PVC.

The outer plastic dome is manufactured from a translucent-white or clear polycarbonate panel with a uniform thickness of 0.118 inch (3.00 mm).

The inner plastic dome is manufactured from a translucent-white or clear polycarbonate panel with one side prismatic with a thinnest thickness of 0.053 inch (overall thickness of 0.118-inch). The prismatic side faces the exterior.

The panels are recognized as Plaskolite, LLC’s Tuffak® SK1 (outer) and SK (inner) under ESR-2728.

4.0 DESIGN AND INSTALLATION

4.1 Design:

4.1.1 Performance Grade: The performance grade (PG) ratings are provided in Tables 1 and 2.

4.1.2 Air Infiltration: When tested at an air pressure differential of 1.57 psf (75 Pa), the skylights have an air leakage rate of less than 0.30 cfm/ft² (1.5 L/s*m²).

4.2 Installation:
The skylight must be attached with minimum No. 8 corrosion-resistant wood screws in each mounting hole provided in the skylight frame, with the screw length being sufficient to penetrate a wood curb a minimum of 1 inch (25 mm). See Tables 1 and 2 for the required number of fasteners. Additional installation details are provided in Figures 1 through 3.

The skylights are curb-mounted and must be installed on a minimum 2-by lumber with a minimum specific gravity of 0.42, sized to the inside dimension noted in Table 1, and of a height sufficient so that the plastic glazing is a minimum of 4 inches (102 mm) above the plane of the roof. The wood curb and its attachment to the roof structure must be designed to resist wind uplift and gravity loads.

Flashing must comply with, and be installed in accordance with, IBC Section 1507 or IRC Section R905, as applicable.

5.0 CONDITIONS OF USE

The VELUX Dynamic Dome Skylights described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

5.1 The skylights must be installed in accordance with this report, Sections 2405.4 and 2610 of the IBC or Section R308.6 of the IRC, as applicable, and the manufacturer’s published installation instructions. In the event of a conflict between this report and the manufacturer’s published installation instructions, this report governs.

5.2 The design pressure (performance grades) for the skylights are as set forth in Table 1 and Table 2, and must be used with the load combinations of the applicable code.

5.3 The manufacturer’s installation instructions must be available at the jobsite during installation.

5.4 The use of the skylights as components of fire-resistance-rated assemblies is outside the scope of this report.

5.5 The attachment of the curbs to the supporting structure is outside the scope of this report.

5.6 The use of skylights in wind-borne debris regions is outside the scope of this report.

5.7 The skylights are manufactured in Greenwood, South Carolina under a quality control program with inspections by ICC-ES.

6.0 EVIDENCE SUBMITTED

Data in accordance with the ICC-ES Acceptance Criteria for Plastic-Glazed Skylights (AC16), dated April 2020 (Editorially revised August 2020).

7.0 IDENTIFICATION

7.1 The skylights are labeled with the VELUX name and address; the Single Dynamic Dome or Double Dynamic Dome series; the model number and the product designation (SKP-PG30); the evaluation report number (ESR-4108); and a safety label complying with Class I, ANSI Z 35.1-1972 (warning of risk of falling).

1.0 REPORT PURPOSE AND SCOPE

Purpose:
The purpose of this evaluation report supplement is to indicate that VELUX® Dynamic Dome Skylights, described in ICC-ES evaluation report ESR-4108, have also been evaluated for compliance with the codes noted below.

Applicable code editions:

- 2019 California Building Code® (CBC)
  
  For evaluation of applicable chapters adopted by the California Office of Statewide Health Planning and Development (OSHPD) and Division of State Architect (DSA), see Sections 2.1.1 and 2.1.2 below.

- 2019 California Residential Code® (CRC)

2.0 CONCLUSIONS

2.1 CBC:
The VELUX® Dynamic Dome Skylights described in Sections 2.0 through 7.0 of the evaluation report ESR-4108, comply with CBC Sections 2405 and 2610, provided the design and installation are in accordance with the 2018 International Building Code® (IBC) provisions noted in the evaluation report and the additional requirements of CBC Chapters 24 and 26, as applicable.

  2.1.1 OSHPD:
The applicable OSHPD Sections of the CBC are beyond the scope of this supplement.

  2.1.2 DSA:
The applicable DSA Sections of the CBC are beyond the scope of this supplement.

2.2 CRC:
The VELUX® Dynamic Dome Skylights, described in Sections 2.0 through 7.0 of the evaluation report ESR-4108, comply with CRC Section R308.6, provided the design and installation are in accordance with the 2018 International Residential Code® (IRC) provisions noted in the evaluation report.

This supplement expires concurrently with the evaluation report, reissued December 2020, and revised February 2021.
DIVISION: 08 00 00—OPENINGS
Section: 08 62 00—Unit Skylights

REPORT HOLDER:

VELUX AMERICA LLC

EVALUATION SUBJECT:

VELUX® DYNAMIC DOME SKYLIGHTS

1.0 REPORT PURPOSE AND SCOPE

Purpose:
The purpose of this evaluation report supplement is to indicate that VELUX Dynamic Dome Skylights, described in ICC-ES evaluation report ESR-4108, have also been evaluated for compliance with the codes noted below.

Applicable code editions:
- 2020 Florida Building Code—Building
- 2020 Florida Building Code—Residential

2.0 CONCLUSIONS

The VELUX Dynamic Dome Skylights, described in Sections 2.0 through 7.0 of the evaluation report ESR-4108, comply with the Florida Building Code—Building and Florida Building Code—Residential, provided the design requirements are determined in accordance with the Florida Building Code—Building and Florida Building Code—Residential. The installation requirements noted in ICC-ES evaluation report ESR-4108 for the 2018 International Building Code® meet the requirements of the Florida Building Code—Building or the Florida Building Code—Residential with the following condition:

Use of VELUX Dynamic Dome Skylights in wind-borne debris regions is outside the scope of this supplement.

Use of the VELUX Dynamic Dome Skylights for compliance with the High-Velocity Hurricane Zone provisions of the Florida Building Code—Building and Florida Building Code—Residential has not been evaluated and is outside the scope of this supplemental report.

For products falling under Florida Rule 61G20-3, verification that the report holder’s quality assurance program is audited by a quality assurance entity approved by the Florida Building Commission for the type of inspections being conducted is the responsibility of an approved validation entity (or the code official, when the report holder does not possess an approval by the Commission).

This supplement expires concurrently with the evaluation report, reissued December 2020, and revised February 2021.
